MG Arnold Fine Art

2023/24 PLT Artist-in-Residence

I am a conservation artist and a western Fauvist artist living and working in Boise Idaho, fascinated with geology and in representing the land and inhabitants of the west. Fauvism seeks to separate color from its descriptive, representational purpose and allow it to exist on the canvas as an independent element without having to be true to the natural world.

Although I work in many mediums and also design and create murals, my primary medium is oil painting and my goal in my art is to emphasize humanity's connection to nature and carrying a message of land and animal conservation through my art. As an Idaho Master Naturalist, I embrace all that I love and observe in nature and continue to learn more every day.
